

SECURITY MONITORING

The Smartest Security Solution in the Self Storage Industry

INSOMNIAC
SmartEye

detect • intercept • alert

Detect

Artificial intelligence and machine learning will stream incidents immediately when they occur.

Intercept

The Virtual Security Team views and assesses the incident and uses speakers to directly communicate with the perpetrator.

Alert

Virtual Security Team can immediately contact police or local authorities if required.

SmartEye Setup

Simple set-up that compliments and uses your existing camera system.

Virtual Security Team

Trained professionals evaluate and respond to incidents in real time, eliminating the need to self-monitor all hours of the day.

*40% of tenants want security guards to monitor/patrol site at all times. 22% would pay extra.**

Precautionary Message

Responds to customers when facility is opened after-hours to reinforce security is of utmost importance.

Interactive Audio/Video Monitoring

Protect your real estate asset and enhance your property amenities.

SmartEye has proven to be an effective tool that we can use to ensure a safe and secure environment for our customers.

—JIM KWITCHOFF, LIFE STORAGE

SmartEye, integrated with your existing CCTV systems, detects suspicious activity as it is happening and immediately alerts our Virtual Security Team (VST). The VST is standing by to respond to the perpetrator with voice commands as well as notify the local authorities. The VST also responds to visitors with precautionary or greeting messages. This reinforces security at your facility and shows customers their valuables are safe.

Set-up is Smart & Simple

IP Speaker – allows Virtual Security Team to communicate and provide voice response when an incident occurs.

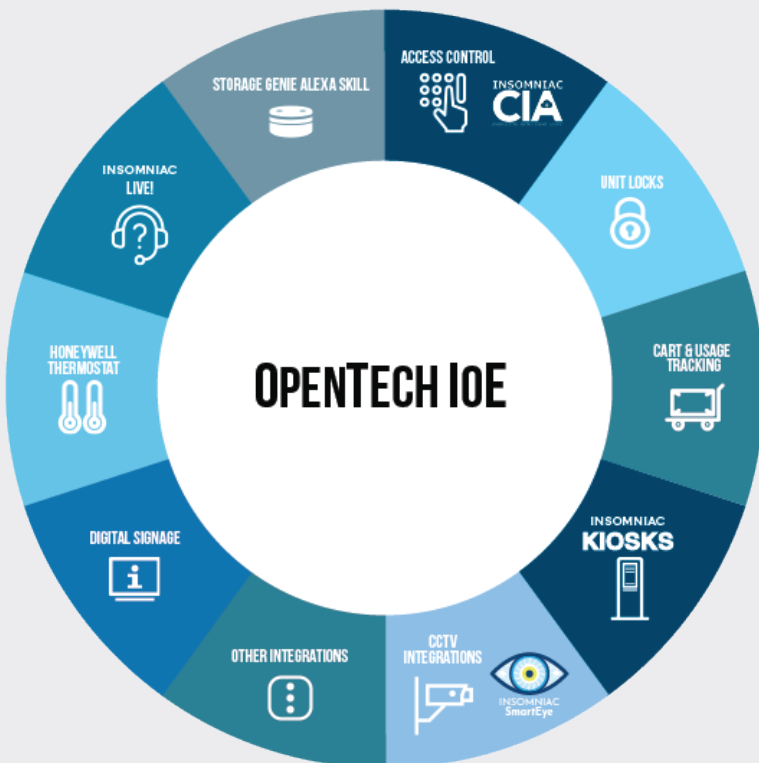

Video Hub – connects to your local network and streams video events to the Central Monitoring Station. There is no need to replace your existing camera system.

Key Features & Benefits

-  Proven results to reduce and eliminate crime at self storage facilities
-  Professional monitoring by our Virtual Security Team (VST)

-  Proactive customer messaging to help them feel safe
-  Facility-specific protocol to fit your organization
-  Compliments and enhances existing security hardware & systems

INSOMNIAC CIA, STORAGE GENIE ALEXA SKILL, INSOMNIAC LIVE! CALL CENTER INTEGRATION AND HVAC ARE AVAILABLE NOW
